

New unified sign for Acomb Industrial Estate.

Improve definition of access road, seeding area of rough hardstanding, with new tree planting.

Formalise off road parking using reinforced grass system.

Remove Japanese Knotweed along parking bays and replace with native Guelder rose (*Viburnum opulus*).

Create new grass verge with new fencing to create gateway.

Remove redundant sign.

New hedge to depot boundary with footpath. Cut willow panels to clad large double leaf gate.

New native hedge planting along fenceline at top of embankment and diversify grass habitat on embankment by introducing wildflowers.

Replace existing fence with live willow wall or plant native native Guelder rose in front of existing fence.

Convert hardstanding along coach depot frontage to green verge with planting to front of existing fence. Replace timber palisade fence with more ornamental fence style or replace with live willow wall.

Bulb planting to traffic island.

Radar speed signs to replace speed camera.

Cut back hedge to Garden House Bank.

Signpost to village centre.

Narrowing of carriageway at 30mph zone.

Scale 1:1000
